

An exceptional curriculum

At Kings Avenue, we believe in providing an exceptional curriculum that is stimulating and challenging that enables pupils to be critical thinkers and problem solvers.

The children have the opportunity to develop a depth of learning in core subjects and transfer their knowledge and skills in hands-on, purposeful tasks. It enables all children to become motivated and confident learners and build on the school's Building Learning Powers of resilience and collaboration. These are all essential skills for our 21st century learners.

The exceptional curriculum is built on 3 key areas: ENTERPRISE, STEAM and DRAMA. Pupils complete 1 key area each term.

Enterprise

The ENTERPRISE area will encompass Mathematics and Computing.

Our enterprise real-life challenges, encourages pupils to develop skills for work and skills for life. Pupils use their entrepreneurial experiences to create their own innovative ideas.

STEAM stands for Science, Technology, Engineering, the Arts and Maths.

STEAM is an integrated approach to learning and allows pupils to make connections between concepts in everyday situations. It encompasses an enquiry, experiential and problem-solving approach to working through a process to an outcome.

Drama and oracy

Effective communication is a key skill to the success of the children in our school. Through drama, the pupils develop the self-confidence and self-awareness. In order to be successful, a focus on oracy skills is at the heart of it. These includes the key skills of listening, responding and expression.
